Alva Political Candidate Forum Answers to State Senator District 27 Questions

Mike Lameyer

Ruby thank you for the invitation to the Alva Political Candidate Forum. I am trying to adjust my schedule to be present. However I do want to answer the questions you have asked.

1) First I do not believe that the Babcock City project has met the use needs requirement. Second I do not have an issue with use need controlled growth projects.

2) I would vote no to FPL charging existing customers for construction of a Solar Power Plant. If there is a plant built the cost should be paid for by FPL and the developer. Solar power is not very cost effective at this time and using 400 acres for the solar panels is not land use productive. In the event a hurricane destroyed the solar field the planed city would be without power for a very long period of time and would have to use other FPL power.

3) Urban growth is a future necessity however tight controls must be in place to protect and preserve rural areas. This has and can be done.

My platform is:

- 1) Create American Jobs.
- 2) Control Taxes.
- 3) Stop Financing Illegal Aliens.
- 4) Enforce States Rights.
- 5) Develop Natural Resources.
- 6) Empower Teachers & Parents To Effectively Educate.

I hope this helps.

Regards, Mike Lameyer
